*If you think adventure is dangerous,
try routine. It's lethal.*

Paulo Coelho

THE BEST CONDITIONS FOR WORKING SAFELY

*Intensive, professional
advice and support*

*Flexibility to create
individualised trainings*

*Fixed pool of experienced
trainers, inspectors and
consultants*

*Authentic training
conditions on the Baltic
coast*

THE INDUSTRIAL SAFETY COMPANY

The experts at your side

ISC is a growing international safety company in the Baltic Sea region. We have made it our goal to support those working in hazardous environments so that they can work as safely as possible. Our experienced team is able to professionally advise on work safety, check protective equipment, assemble in unconventional locations and train personnel to competence. We know what really matters in terms of safety.

To achieve great things

Whether in the office, up high on a wind turbine or out at sea on an oil rig, we know what you need to be aware of. We can safely navigate you through the legal requirements, check and monitor your technical equipment and support you with relevant trainings.

FROM PRACTICE, FOR PRACTICE

Three brands under one roof

The combination of knowledge and practical experience is what our clients can profit from the most. What began in 2008 as an assembly company for industrial and military contracts has grown into a successful brand to include trainings and consulting.

Since 2014, the ISC team has been made up of a fixed pool of employees and we have become well-known throughout Europe. This way, our trainers are able to gain invaluable practical and consulting experience and are also able to respect the position of our course participants.

COMBINED COMPETENCE IN THREE FIELDS

STAR TRAININGS

KEEPING SAFETY IN FOCUS

*Authentic.
Experienced.
Passionate.*

SAFETY EXPERTS

FOR THE SAFETY
OF YOUR EMPLOYEES

*Competent.
Flexible.
On the ground.*

INDUSTRY ASSEMBLY

CONTRACTS FOR SPECIFIC
REQUIREMENTS

*Professional.
Punctual.
Reliable.*

STAR TRAININGS

Real consulting. Real character. Real life.

More than standard

Which trainings do I or my employees actually need? Which legal requirements do I need to be aware of? How do I book trainings and get myself or my employees back to work? When time is of the essence there's no need to worry about these sometimes tricky issues – we can assist you throughout the whole process and leave the final important decisions up to you.

Suitable solutions

We check your safety requirements and develop tailor-made concepts with which you are sure to be on the safe side. In addition to existing rescue and evacuation procedures, we can carry out relevant and useful on-site trainings or individually designed trainings, where needed.

STAR TRAININGS

Making the workplace safer

The best conditions

Our trainings are carried out under realistic conditions in the harbour in Rostock. Innovative equipment from renowned manufacturers, modern training classrooms fitted out with the latest technology, and a friendly vibe ensure a pleasant and motivating learning atmosphere. Our mobile equipment also allows us to carry out parts of our STAR training at your location.

Knowing what's important

Our instructors work professionally and authentically. They deliver important and intensive trainings enabling the participants to continue safely through their working life. It is true that everything learnt with enthusiasm and in a pleasant atmosphere is kept longer in mind. Because STAR trainings are booked by participants from all over the world, the coaching team is also internationally staffed.

Keeping safety in focus

I want our participants to go home feeling safe in the knowledge that when it really counts, they can make the right decisions to keep themselves safe.

Marcel Schuldt | Senior Trainer and Coordinator

*For the safety of your
employees*

*When I check our customers' equipment and
material, then always with 100% accuracy.
After all, human lives depend on it.*

Michael Pett | Trainer and Safety Expert

SAFETY EXPERTS

Broad expertise and a wealth of experience

A partner you can rely on

Technical possibilities, local conditions and legal requirements change very quickly. Those who are responsible for employees in particularly dangerous situations, should keep up to date with such changes and seek advice accordingly. If you are looking for safety experts who will keep you up to date, you have an excellent partner in us.

Keeping up to date

We reliably check the equipment you use when working at high locations, as well as the safety of fixed ladder systems leading up to those high-altitude workplaces. Do you require comprehensive advice on appropriate equipment and suitable safety concepts? Then profit from our broad expertise, our experience, and our direct cooperation with research teams and relevant manufacturers.

INDUSTRY ASSEMBLY

Professional special assembly

Reliable and to the point

Assembly is not always assembly. There are jobs with particularly high safety demands - for example, where no regular access by crane or lifting platform is possible. Whether high-altitude assemblies or offshore jobs, the far-reaching additional qualifications of our team allow us to professionally and reliably fulfill your requirements where others may not be able to.

Well-known customers worldwide

Whether energy supply, oil and gas production, space travel, maritime economy or military and defense technology: numerous well-known and internationally active companies trust in our diverse range of services. We work according to internationally recognized standards.

*We carry out installations and maintenance
in locations that nobody else can reach.
And we do our utmost to find suitable
solutions for every individual situation.*

Karys Adjei | Team Lead and Coordinator

”

A wide-angle photograph of a harbor scene. In the foreground, a red and white motorboat with 'ISC Offshore Training' and 'Rostock' written on its side is moving across the water, leaving a white wake. A person in a blue shirt is at the helm. The background features a row of colorful buildings along the waterfront and a prominent church with a tall, dark spire under a cloudy sky.

ISC ON THE BALTIC COAST

Out into the world

Maritime tradition

The traditional Hanseatic city has always benefited from its prime location on the Baltic coast and even to this day, maritime knowledge and skill centres are concentrated here. In maintaining a close connection between science, research and industry, we are moving forward with innovative flagship projects such as the upcoming Ocean Technology Campus. By boat, plane, rail and road, Rostock can be reached quickly and easily making it an ideal training location.

Lively student city

After a day of training, stroll through the historic old town, enjoy a fresh fish sandwich in the old harbour of Warnemünde, soak up the lively bars of the city, or simply enjoy a nightcap on the floating hotel: if you are looking to unwind after a day of training, Rostock definitely has something for everyone.

Improving occupational safety worldwide

Volker H. Seibert
COMPANY FOUNDER, CEO AND AUTHOR

Being an internationally recognized professional and by sharing his extensive knowledge, Volker H. Seibert continues to develop his basic teaching materials and books and thus leads the way for the industry. The ISC managing director is not only an occupational safety specialist, but also a learned communication scientist who has many years of experience working in assembly. He is a member of various national and international industry associations and institutions, and gives lectures on safety in the workplace.

COMMITMENT TO A SAFER WORLD

With good intentions

Doing good

When it comes to promoting workplace safety and training personnel in the wind industry, ISC is at the forefront. We organise the annual Rostock Offshore Symposium, which is a firmly established international congress of the wind industry. In addition, the company participates in the development of international standards and is a member of various committees supporting the research and science of occupational safety.

Helping with what we do best

Making the world of work a little safer every day. We support internationally recognized NGO's with our trainings and are proud to present the field of first aid at various events around the world. In our company promoting the importance of renewable energies and paperless working, among other things, are crucial.

**Motivated, professional
and passionate –
We know what is
important!**

JOBS AT THE INTERNATIONAL SAFETY COMPANY

Making the world safer!

Our trainers, consultants, designers and examiners have only one goal in mind: maintaining the highest level of safety for employees in hazardous industries. Do you enjoy working with people from all over the world? Do you want to develop your skills? Do you want to be part of an appreciative and open team and enjoy great working conditions? Working with us at ISC can offer you new challenges on a daily basis, a diverse range of tasks and working locations, flat hierarchies and the knowledge that your work is valued.

“

*We only feel safe when we're certain
that we're not alone.*
